## INDEX TO PRODUCT INFORMATION

Listings in the Index to Product Information are not a part of the advertiser's contract; no allowance will be made for possible errors or omissions.

### MR. BUYER: Use This Index First!

**T**HIS index is for your convenience. It coordinates and makes readily available to you the information concerning the thousands of items of merchandise offered in the advertising in this volume.

The product information of over five hundred manufacturers is presented thus as a unit, almost as a composite catalog, indexed and cross indexed so that, when seeking an item, you can see at a glance what companies make it and on what pages their products are illustrated and described.

If the item you are seeking is not listed here, refer to the general Merchandise Directory section starting on page 51 for the manufacturer's name, brand name, etc., and write for his catalog and the name of his jobber in your territory. Also tell him of the added convenience to you if he had given you his product data in this Merchandise Guide.

This "Index to Product Information" is presented entirely for the convenience of the buyer and only those items are indexed for which information is given in each catalog-advertisement.

Mention Hardware Age When Writing

"THAT'S MY PUSHER"

"When some one tries to tell me a hardware store's file market is limited to walk-in customers with files on their minds, it's like arguing that a fish can't swim up-stream. Shucks! All that's needed is a little 'push.'

"That's my motto. And here's my 'pusher'—the attractive sales-boosting Nicholson Display Unit. I figure that nine out of ten customers on the hunt for other merchandise need files and can be made prospects with a little reminding.

"The day I set this little 'pusher' where it could put its hypnotic influence to work, you should've seen my file sales shoot upward!"

Not a fairy tale, but based on actual examples where the use of the Nicholson or Black Diamond Display Unit has greatly increased—even doubled—file sales for hardware retailers.

Why not prove its sales-magic for yourself! You can't lose . . . the substantial display box costs you nothing, and the initial fill of files will be gone before you realize. Don't wait for your jobber's salesman to call . . . MAIL THE COUPON to us and we'll see that you get quick action.

## ROOFING NAILS

For long life roofing requires the best of nails. Such nails cost but a small fraction of the value of the roofing they hold, yet they add years to the life of the roof.

DICKSON quality and low prices are largely responsible for the heavily increased use of lead head nails in recent years for metal roofing. DICKSON roofing nails are made by high speed automatic machinery insuring low production cost and correspondingly low cost to consumer.

In order to meet a pressing and growing demand for special nails for asphalt and similar types of prepared roofing, metal shingles, etc., we are offering a few styles of special nails, as illustrated.

### The RED EDGE Perpetual Inventory Tag

... an exclusive Reynolds development ... tells instantly the number of feet of screen cloth left in a roll. It has one-foot marks, and off, or check off, from tag the number of feet sold. Use on hardware cloth, chicken wire, and glass cloth, too. Enough tags for your needs, sent free. Your jobber has a supply or write us direct.

## SELF-MEASURED WIRE SCREEN CLOTH

A COMPLETE LINE ... all trade mark identified and self-measured. Red Edge Screen Cloth meets every specification of the Bureau of Standards, U. S. Dept. of Commerce. It is made of either open hearth steel wire or commercial bronze wire (90% copper and 10% zinc) and all wire is drawn in Reynolds own wire mill. Every roll is one continuous piece—100 lineal feet of perfect cloth.

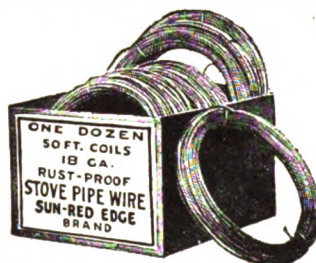

### ALUMINA

Reg. U. S. Pat. Off. Woven of special grade open hearth steel wire and covered with many coats of chemically pure zinc by electro-plating process. A transparent coat of varnish is then baked on. The best quality electro-plated screen cloth. Furnished in standard 12, 14, 16 and 18 meshes in widths 18" to 42", also 48"; special extra wide widths, 54, 60, 66 and 72 inches in 16 mesh only. Medium priced, high-grade cloth.

**BLACK PAINTED** ... Woven of special grade open-hearth steel wire. Coated with high-grade black enamel giving an elastic finish which will not flake off. Made in standard 12 and special 14 and 16 meshes and in widths 18" to 42", also 48"; special extra wide widths, 54, 60, 66 and 72 inches in 12 mesh only. A low priced but very satisfactory cloth.

**BRONZE** ... Made of commercial bronze wire, 90% copper, 10% zinc. Made in standard 14, 16 and 18 meshes, in widths 18" to 42", and also 48". Special extra wide widths, 54, 60, 66 and 72 inches in 16 mesh only. A very high-grade and higher priced cloth which will last indefinitely, and is specially recommended along the sea coast. Bright, natural copper finish, unless otherwise specified. Our Noxide Bronze has antique finish.

Recommend the Finer Meshes for best protection against small insects, dust and dirt. 16 mesh is required by the U. S. Public Health Dept. in malaria sections, to keep out the Anopheles (malaria-bearing) mosquito.

### RED EDGE Stove Pipe Wire

Made of strong, specially drawn wire. Rust-proofed by our special process. No tie wires used and coils can be easily opened or tied by thumb pressure. Put up in 50-ft. coils, 12 coils to the carton, 50 cartons to the case. Made in No. 18, 19 and 20 gauges, also in 20 gauge coppered.

### Save 6% on Freight Charges with this Package

Only Red Edge Screen Cloth is marketed in the Spiral-Wrap End-Cap Round Package. Less bulky and lighter in weight than the ordinary square carton, it saves you 6% in freight charges yet affords complete protection to the screen cloth. Screen rolls are automatic machine wrapped with 120 lb. Kraft spirals and the roll ends capped with heavy duplex fabric tape. Tape and spiral edging are a handsome red which makes the package strikingly attractive for display purposes.

REG. U. S. PAT. OFF.

### NEW RED EDGE ADJUSTABLE METAL BAND KEEPS ROLL TIGHT ... SAVES TIME

Again the makers of Red Edge have developed a remarkable time-saving convenience for handling wire screen cloth. Far superior to clips and similar devices ... these Red Edge flat, flexible metal bands *always fit* ... always keep cloth rolled tight, whether the roll contains fifty feet or five.

Just slip free end of band through eye, forming a loop, and pull until it fits roll snugly. Then bend end down ... and band clamps tight to roll. To unroll—raise free end ... slide band back through eye, loosening loop ... and slide off roll. Bands come 12 in a box. Free, at your jobber's or

Always economical and efficient. All working parts are simple and sturdy. There are no springs. The door is counterbalanced with a weight box to be filled with sand. The turn-over action as illustrated will clear any modern car with space to spare if rear bumpers clear the door.

The door can be sealed on all four sides with weatherstrips. All hardware parts are inside, protected from the weather. Ideal for basement installations, as only 5½ in. headroom is required.

The positive locking-device holds the door against wind pressure and is designed to be secured with a standard padlock. When wanted, an individual cylinder locking handle can be furnished at a slight increase in price of set.

**UTICA TOOLS**  
*for Tool Mileage*

## TOOL MILEAGE

"Tool Mileage" is what counts in pliers . . . the number of cuts before the cutting edge wears dull or breaks. In actual tests, UTICA *Alloy Steel* pliers have outlasted competing pliers by many thousand cuts.

UTICA pliers and wrenches are made from *Special Alloy Steel* by craftsmanlike methods and scientific heat treating. They are rigidly inspected and tested to make sure that all UTICA tools are the best in quality.

Above is illustrated the Utica Hardware Display Case showing the more rapidly moving numbers of the most complete line of pliers in the world. UTICA pliers are made for mechanics who know and want the best in tools and realize that tool mileage is the answer to the question of tool value and economy. Get on the profit side with UTICA tools.

**WICKWIRE BROTHERS, INC.**  
CORTLAND · NEW YORK · U. S. A.

**CORTLAND-WICKWIRE**... A complete line of screen wire cloth, from wire to finished merchandise—manufactured under one control, in one group of mills—serving the hardware trade uninterruptedly for more than 65 years.

**ALL CORTLAND-WICKWIRE SCREEN WIRE CLOTH**... made in even inches from 18" to 42" inclusive; also 48" double four wire selvage as standard. Also made in extra-wide widths. Cortland Gray-wick, Cortland Black and Cortland Ultra-Premier are made from Open Hearth, Copper-Bearing Steel Wire; Cortland Bronze from a special alloy of 90% Copper and 10% Zinc.

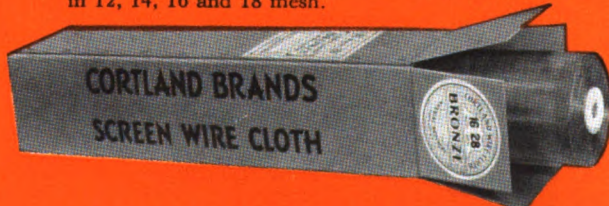

**CORTLAND ULTRA-PREMIER**... A galvanized screen wire especially suited to hard usage. Made of extra heavy wire (about  $\frac{1}{3}$  heavier than standard cloth). Ultra-Premier will "stand up" under an unusual amount of strain and stress to which doors, windows, etc. are usually subjected. Its superior weight and strength actually strengthens the entire supporting structure. Because of greater wire diameter the decimal size openings of Ultra-Premier is the equivalent of 16 mesh.

**CORTLAND BLACK ENAMELED**... A low-priced screen cloth with a tough, elastic black-enameled finish. An exceptional value at the price. Extra wide widths, 54", 60" and 72". 12 Mesh only.

**CORTLAND GRAY-WICK (Dull Galvanized Finish)**... A very popular, all-purpose screen wire. Electro Zinc Coated and enameled with a Pigmented Varnish—thus doubly protected against corrosion. Extra wide widths, 54" and 60". Made in 12, 14, 16 and 18 mesh.

**CORTLAND BRONZE**... Absolutely rustless under all weather conditions—unaffected by salt air, acids or gases, of far greater strength and durability than steel cloth or even copper cloth. Sells for a bit more than screen wire cloths made from steel wire, but well worth the difference. Also furnished in Antique finish to avoid the glare of bright bronze.

Easy to display.

## HEAVY WIRE CLOTH

# For 1940 PREWAY

has the *hardest hitting* sales story  
in the space heater business

Three  
new and  
amazing  
developments  
★

Investigate the only  
oil-burning heaters with  
*Controlled fuel generation*  
*Thermol humidifying*  
*Quick, detachable blower*

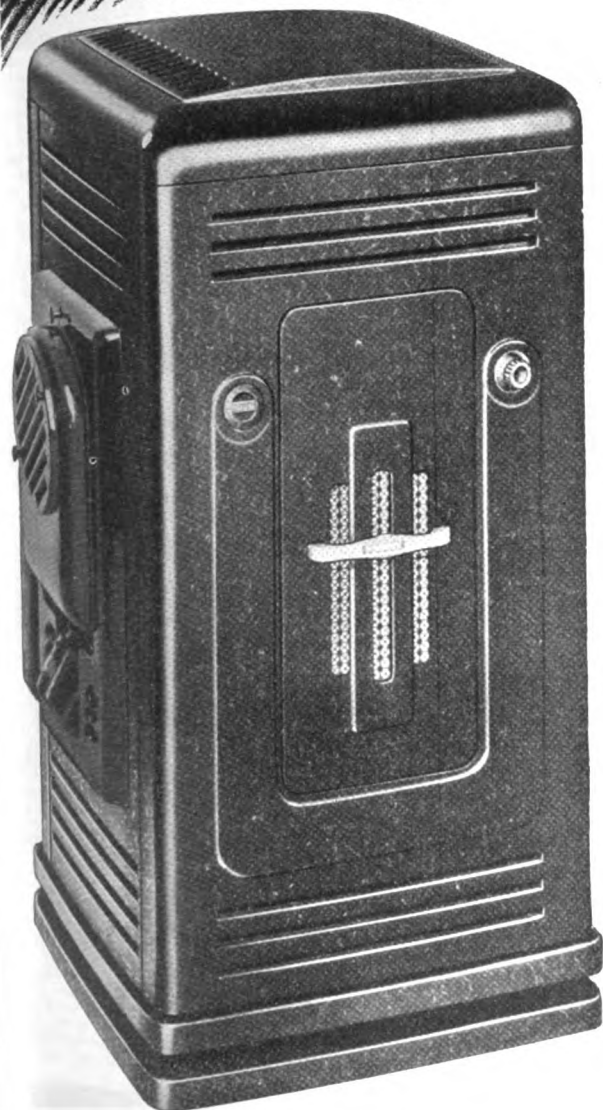

The PREWAY line for 1940 features the greatest engineering developments in oil-burning heaters in fifteen years. With these advantages you can step completely away from competition—offer your customers exclusive features in greater comfort and increased heating efficiency that no one else can show or talk about. For example:

**Only PREWAY** heaters have *controlled fuel generation*—the perfect combustion burner that is *guaranteed* to burn with a flame free from carbon, smoke, or soot.

**Only PREWAY** heaters have thermol humidification—a wholly automatic system of boosting humidity within the home to provide more *healthful living conditions* and more *economical operation*.

**Only PREWAY** heaters have the detachable, adjustable Power-Flo blower unit that *adds to the capacity* of the heater in winter, and *actually cools the house in summer*.

There are many more advantages built into these popularly-priced heaters that you can point to, that add up to make the PREWAY line the difference between being in the *big money* this season, or out of it, on oil heater sales in your trading area. Ask your jobber today, as alert dealers everywhere are doing, or write direct for complete information.

# Your Mechanic and Handyman Trade will buy these famous PARKER-KALON PRODUCTS

## Hardened Self-tapping SHEET METAL SCREWS

Type "A" Type "Z"

—for joining and making fastenings to metal without tapping

The GENUINE product—made only by Parker-Kalon. The Screws, turned into drilled or punched holes, form a thread in the metal . . . hold better than machine screws or nuts and bolts. Save time, labor, money. Used in all leading autos, radios, airplanes, etc., and by tinsmiths, auto repair shops, sign makers, etc. Type "A" for making fastenings to sheet metal up to 18 gauge. Type "Z" for fastenings to sheet metal from 28 gauge to 6 gauge; also to aluminum and die castings, plastics, etc. Made in a wide range of sizes with slotted and Phillips Recessed heads, in various head styles and finishes. Packed in boxes containing one gross or 1000 of a size.

## Hardened MASONRY NAILS

—for fastening to Brick, Mortar, Concrete, etc.

It's easy to fasten to brick, mortar, concrete, with Hardened Masonry Nails. Easier and cheaper to use than expansion bolts, lead anchors and plugs, hooks, spikes, etc. Also, they require smaller holes than such devices, saving drilling time. They hold securely because the spiral ribs become embedded in the masonry. Used by tanners, plumbers, electricians, handymen, etc. Made in 5 sizes— $\frac{3}{8}$ " x 1" to  $\frac{1}{4}$ " x  $2\frac{1}{2}$ ". Put up in boxes containing 100 of a size.

## Hardened SCREWNAILS

—for fastening sheet metal to wood—securely

Combine the easy driving qualities of a nail with the strong holding power of a screw. Parker-Kalon Hardened Screwnails do not bend or break and will not work loose, back out or pull out. The hardened spiral threads cut into the burr formed in the sheet metal by the pilot (smooth portion above the point) and worm their way into the wood. Unbiased laboratory tests prove that Hardened Screwnails have over 4 times the holding power of ordinary nails. Packed in boxes containing 1000 of a size.

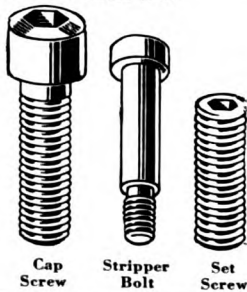

## Cold-forged CAP NUTS, WING NUTS and THUMB SCREWS

WARP'S WINDOW MATERIALS HAVE POINTS OF  
SUPERIORITY FOUND IN NO OTHER GLASS SUBSTITUTES

Not Just Dipped or Laminated

They have a waterproof foundation  
and are scientifically constructed!

124 tightly woven pre-shrunk threads in every square inch, acting the same as iron braces in concrete construction.

A patented mineral filling, high in ultra violet ray transmission, pressed into every crevice and smoothed over entire surface. The special mineral filling used in **Genuine Flex-O-Glass** will not disintegrate when wet.

Final step is to thoroughly impregnate every fibre as well as the mineral filling with a solution of high melting point, exceptionally waterproof wax composition, that will not run or discolor in use. **Flex-O-Glass** has a self-healing characteristic. **Genuine Flex-O-Glass** will not deteriorate in storage. It is the leading window material, truly a quality product.

Over 80 pre-shrunk threads per square inch.

Extra heavy filling that has no capillary action.

Same melting point of light stable wax coating as is used in making **Flex-O-Glass**, but not as highly impregnated and not quite as transparent. Can be patched with a hot flatiron. **Warp's Window-Fabric** will not deteriorate in storage.

Patent Pending

**Warp's Glass-O-Net** has extra strong cords that will not soak up with water to act as wicks, because every cord is waterproofed.

Tough waterproof composition around each joint so as to bind all parts securely together. No air spaces in **Warp's Glass-O-Net** to make it feel thicker. No place for water to lodge.

Exceptionally transparent cellulose acetate coating, extra high in ultra-violet ray transmission, bonded together into one solid sheet. You will find no cheap rosin, glue or paste to decompose in **Warp's Glass-O-Net**.

Patent Pending

Extra strong, galvanized wire base, drawn tough and thin so as to admit more light. Every strand securely held in place by being sealed at every joint.

Tough, transparent weatherproof plastic applied over all the joints and wires before the cellulose acetate is applied. Exceptionally transparent cellulose acetate coating, extra high in ultra-violet ray transmission, applied over a tough plastic cushion that bonds everything securely together into one sheet. You will find no air holes, no cheap rosin, no glue or paste to decompose in **Warp's Wyr-O-Glass**.

## **1** **AUTOMATIC — NO DRAFT** **DOR-SEAL**

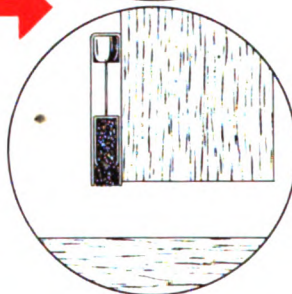

(OPENS AND CLOSES AUTOMATICALLY)

A simple, effective, low cost device which anyone can attach to inside or outside doors with a screw-driver in five minutes. Is made of finest bonderized steel and felt; in three attractive finishes. Comes in five standard sizes to fit doors 28", 30", 32", 34" and 36". Individually packed. Sales helps include Operating Counter Model; Counter Cards and Circulars.

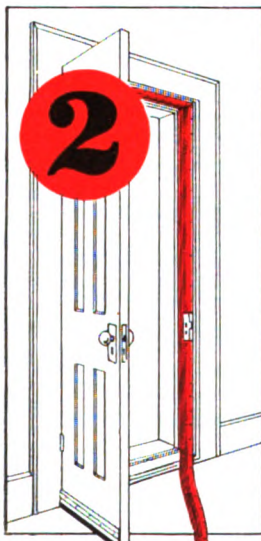

### **DOR-SEAL CLOSED**

Dor-Seal fits inconspicuously on the inside of any door. When the door is closed, it presses firmly against the floor, sealing the gap and stopping cold drafts. Seals a gap up to  $\frac{3}{4}$ " in height. Also deadens sounds.

### **DOR-SEAL OPEN**

Dor-Seal operates automatically—every time. When the door is opened, Dor-Seal raises instantly so that the door can clear a rug or carpet. There is nothing to adjust or get out of order. Nothing to catch clothing or cause injury to little fingers.

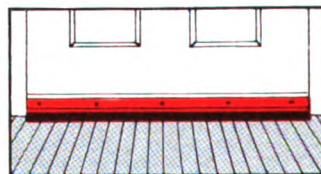

## **2** **BRONZE** **WEATHER** **STRIP**

### **FOR WINDOWS** **AND DOORS**

All bronze and rustless; double-hemmed and corrugated for extra strength. Pre-punched for easy nailing. Comes in convenient "dispensing" packages of 100 ft. coils, nails and instructions included. Four widths— $\frac{7}{8}$ " 1"; 1  $\frac{1}{8}$ " and 1  $\frac{1}{4}$ ".

## **3** **METAL COVERED** **DOOR** **BOTTOMS**

A practical, efficient and inexpensive door sealer, made of first quality, heavy moth-proofed felt set in solid brass strip. Easily cut to exact door width.

### **TWO TYPES**

Type A, in 36" or 42" lengths, comes with slotted screw holes and brass screws. Type C, in 36" lengths, is prick-punched and nails are supplied. Door Bottoms are packed in cartons of four dozen.

**COFFEE CUP Pattern—No. CC**

A one-color pattern that glorifies the American national beverage. Available in red, green, black or blue—the same colors that were so popular last season.

*Better Looking! Easier  
to Clean! Faster Selling!*

• Today's demand is for chrome pipe . . . especially BALLONOFF Chrome Pipe. Because today BALLONOFF Chrome Pipe is even better than ever—at no increase in price! It is *triple plated*, like the finest household appliances. Highest grade cold-rolled, heat resisting steel is the base. *First*, copper is applied . . . forming a perfect bond between the steel and the final finish, and offering resistance to corrosion and rust. *Second*, nickel plate on top of the copper, providing additional luster and protection. (Where low price is the important factor, nickel is the final finish). *Third*, chrome plate over the nickel. Chrome is the acme of perfection . . . an absolute guarantee against tarnishing . . . positive assurance of *lasting beauty*. Send for discounts and free samples—and judge for yourself.

**SAUNDERS NORVELL says—**

**"OIL  
Is More Valuable than  
GOLD"**

( See the June 27th issue of Hardware Age )

And OIL IS GOLD when Hardware and Implement Dealers selling Apex oil products actually gross 202%, 292%, 449%, 598% and 620% on turnover of stock each year.

How? Because Hardware and Implement Dealers selling Apex products get real volume. Because there is a big margin of profit with Apex and a rapid turnover of stock.

*The APEX OIL PRODUCTS COMPANY is the largest supplier of motor oils and greases to independent hardware and implement dealers in the United States.*

For ten years, Apex has re-pioneered the profitable oil business for the Independent Hardware and Implement Dealer who pioneered this business 30 years ago. Ten years ago, regular customers of the Hardware and Implement Dealer started to buy motor oil from chain stores, automobile

supply stores, etc. Today, Independent dealers the country over are selling great volumes of Protex and Film-X Motor Oil at a good profit.

Who of your customers form this market for oil? First, the Farm market which uses more motor oil than any other class in their automobiles, trucks, tractors and farm machinery. Next in the United States are 15,629,000 people earning from \$12.00 to \$40.00 per week. Of the motor car owners in this group, it is estimated that 75% change their own oil. These people do not buy their oil from the service station. They prefer to save money by changing their own oil. This immense market already exists and is constantly increasing. It is simply a question of whether they buy oil from you, the Hardware and Implement Dealer, or from the chain store or automobile supply store.

Are you selling these people a better oil for less money and greater profits to you? Are you capitalizing on Apex modern packages and display, modern selling helps and proven selling plans? If not, see your Wholesale Hardware Jobber's salesman or write Apex Oil Products Company, Minneapolis, Minn., today.

## RE-PIONEER WITH APEX AND PROFIT WITH OIL

PROTEX MOTOR OIL exclusively distributed by the TRU-TEST GROUP of Wholesale Hardware Jobbers in the 48 states and by leading Hardware Jobbers in the Northwest.

# CONDENSED CATALOG OF Pittsburgh Fences

FARM, POULTRY, and LAWN STYLES  
WELDED-JOINT and HINGE-JOINT TYPES

*As a convenient reference you will find here, in condensed form, catalog information covering the standard (simplified practice) styles of farm and poultry fences, together with the approximate shipping weights of hinge-joint, lock-joint and welded-joint fence.*

*This is useful reference information no matter what brand of fence you buy. The weights given for hinge-joint fence, for example, will approximate the weights of all brands of hinge-joint fence.*

*The "Condensed Catalog" would be incomplete if it did not include, as it does, the numerous special fences made only by Pittsburgh Steel Co.; and we call your special attention to the new close mesh fence fabrics on page 3 and new lawn fence items shown on the last page.*

This is an unretouched photomicrograph (enlarged 500 diameters) of the Premium Hot Zinc Coating on Pittsburgh Fence Wire. The bottom section is a portion of the steel. Next above is the iron-zinc alloy bonding layer. Next is the heavy outer layer, this one of pure bright zinc. The black section is merely the background of the photograph. Write for a free comparison card showing relative coating on some leading brands of fences.

# Lawn Fences Fence Fabrics Pittsburgh Fence

## Plain Top Lawn Fences

### Non-Climbable

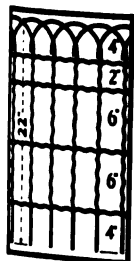

The Pittsburgh Plain Top Lawn Fences are fully comparable in strength and effectiveness to the ornamental designs shown on the following page and are popular not only for some lawn fence applications where ornamentation is not important, but also these styles are used for many enclosures such as poultry enclosures, dog enclosures, laundry or service yard enclosures and for tree guards, garage partitions and innumerable other applications. In the 2" spacing of pickets these fences are practically non-climbable.

## Close Mesh Welded Fence Fabrics

One of the newest of this group is the 1" x 1" mesh added last season. Wires spaced only 1" x 1" center to center gives it a multitude of uses for wire floors in poultry houses, sun porches, batteries and feeding racks. Also such uses as cages, pens, traps, baskets, window guards, storage bins, spring or well cooling baskets, etc.

Other popular welded meshes include 1" x 2" mesh for broiler and adult chicken floors; 1" x 4" mesh, which is the ideal turkey floor fabric; 1½" x 6" broiler feeding fence; 2" x 6" chicken feeding fence; 2" x 4" mesh called the fabric of "101" uses and 2" x 2" fur farming fence. All are premium zinc coated.

Figure 1 consists of four diagrams arranged in two pairs. The left pair is labeled 'Crimped' and the right pair is labeled 'Straight'. Each pair contains a diagram showing the relationship between the space between bars (in inches) and the number of bars per inch. The vertical axis for all diagrams is 'SPACE BETWEEN BARS - INCHES' with values 4, 2, 6, 6, 6, 6, 6, 6, 6, 6. The horizontal axis for all diagrams is 'BARS - INCHES' with a value of 948. The diagrams show that for a given space between bars, the number of bars per inch is constant. For example, for a space of 4 inches, there are 237 bars per inch (948/4). For a space of 2 inches, there are 474 bars per inch (948/2). For a space of 6 inches, there are 156 bars per inch (948/6).

**RIVETLESS SOCKET COAL SHOVELS & SCOOPS**

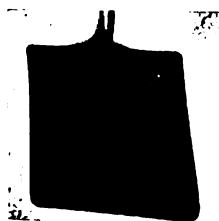

### ELECTRIC WELDING

Front and back straps are electric welded to blade. This electric weld maintains 99% of the strength of the virgin metal. In Plain Back shovels, look to the welding for service. Electric welding is an exclusive "Ames" feature.

### SHOCK BAND

The "Ames" Shock Band is an exclusive feature of "Ames" Solid Shank Shovels. It increases the handle strength. Applied above and below the socket it reinforces the handle at the point of greatest strain.

### RIVETLESS SOCKET

The handle is fastened to the scoop by a rivet at the frog. Back of socket is welded to 2" from the top. End of handle is reinforced with steel cap. Elimination of rivets from socket provides a smooth surface for hand to slide over. Assures less possibility of handle breakage at socket.

## SHOVELS, SPADES & SCOOPS

The "Ames" Line of Shovels, Spades and Scoops is the most complete line available. It consists of Plain Back, Solid Shank, Solid Socket, Socket Shank, Taper Rolled, Closed Back, Hollow Back and Rivetless Socket styles. All styles are supplied in Alloy, A, B and C grades except Solid Socket which is manufactured in A Grade only.

The finest steel obtainable is used and the important heat treatment of "Ames" Shovels gives them their extra hardness and toughness to resist wear. Handles are of Northern Ash. The many features embodied in "Ames" shovels make them the finest and most satisfactory tools on the market. Backed by one hundred and sixty-six years of shovel making experience "Ames" Shovels, Spades and Scoops are still the leaders in their field.

### FAMOUS ARMOR-D HANDLE

An armor of steel surrounds and locks the wooden fork. Provides smooth surface and adds strength to the handle. It is the most perfect handle yet invented. There is no wobble to an Armor-D Handle.

## FORKS, HOES and RAKES

### "Ames" Complete Line of Steel Goods

In appearance, quality and serviceability, the "Ames" line of Forks, Hoes and Rakes is of the highest possible standard. The use of special steel gives unusual strength and ability to resist wear. The steel is heat treated which insures hardness and toughness so necessary to long service.

A feature of "Ames" Forks is the new "Ames" Solid Shank, one piece construction, which gives added strength, and a perfect balance. Socket and head are made as one unit, forged from bar steel. Here is a line of steel goods which assures consumer satisfaction.

### DIE PRESSED LABELS

"Ames" labels are die pressed into the wood in two colors. They can't come off or become mutilated. Are as permanent as the handle itself and add greatly to appearance of tool.

# IF YOU'RE LOOKING FOR *Extra* SALES

## THERE ARE 12 IN EVERY CARTON OF ACME TACK-POINT CORRUGATED FASTENERS

*Why?* Everyone who uses a hammer is a prospective customer. Homeowners, carpenters, cabinet-makers, anyone who works with wood—has a need for this handy item. The attractive display carton acts as a reminder to your custom-

ers—proving a valuable source of extra sales to you.

ers—proving a valuable source of extra sales to you.

Acme Tack-Point Corrugated Fasteners can be used for repairing furniture, making screens, cabinets and numerous other wooden articles. This wide use makes them a "natural." Give them a chance to sell for you — they'll keep your cash register ringing with extra sales.

## ACME EMBOSSED BOX STRAPPING

Has wide use as reinforcement for wooden cases and crates. The staggered bosses protect the nail heads. Available without or with nail holes punched  $1\frac{1}{2}$  inches apart. Made in six sizes and wound in coils of 300 feet. Each coil has convenient holder for easy mounting in shipping room. Sold in case lots. Mail the coupon for details.

## PENETRATE BUT DO NOT CRUSH THE WOOD FIBERS

It's the Tack-Point feature of Acme Fasteners that makes driving so easy. The sharp cutting edges penetrate but do not crush the wood fibers. Fasteners are available in two types: parallel and divergent. The divergent tend to

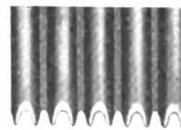

draw the two pieces of wood closer together, assuring stronger joints.

## ACME CORRUGATED FASTENERS WERE FIRST ON THE MARKET

Acme manufactured the first Tack-Point Corrugated Fasteners on the market. Their sturdy strength and econ-

omy have resulted in mounting customer satisfaction for a period of more than 40 years.

## PACKAGED IN THREE POPULAR SIZES

50 fasteners of one size to a box— $\frac{3}{8} \times 4$ ,  $1\frac{1}{2} \times 5$  or  $\frac{5}{8} \times 5$ . The display carton contains 12 boxes. For larger requirements: standard cartons of 250, 500, and 1000 fasteners; boxes of 100

Fasteners, 10 boxes to a carton; and in 100-lb. kegs. Mail the coupon for free sample and judge their money-making opportunities for yourself.

## CHAIN THAT CANNOT KINK OR TANGLE

For over twenty-five years we have been developing assemblies of distinctive beauty and utility, and have assisted many manufacturers in advantageous and economical methods of adapting BEAD CHAIN\* to their products. BEAD CHAIN\* is a series of perfect swivels that form a smooth running chain of unexpected strength.

# BEAD CHAIN\*

Four of the most popular standard sizes are illustrated above, made of brass, nickel silver, monel and other metals in natural, gold and chromium plate finish. There are couplings and attachments for many purposes.

Our engineering design service is available to manufacturers and designers to cooperate in the development of assemblies and uses for BEAD CHAIN\*.

## THE GREATEST CONTROL FACTOR FOR A QUALITY PAINT JOB

# POL-MER-IK *Boiled* IN CANS!

### THE DEALER CAN CONTROL HIS PROFITS!

The day you start selling Pol-mer-ik Linseed Oil in Cans, you roll the old drum out of your store and eliminate such bulk-selling losses as over-measuring, drips, leaks, and foots. You eliminate, too, the time lost from the selling floor, while filling some customer's container.

You can control your profits with Pol-mer-ik in Cans. You buy a can. You sell a can. There are no losses. Your profits are sure and certain.

### THE PAINTER CAN CONTROL THE QUALITY OF HIS JOBS!

Pol-mer-ik Boiled gives the painter two proved values to work with. The first value is the 10% of polymerized linseed oil. This oil is kettle-cooked to a heavy viscosity. It makes paints brush and level better — gives paint jobs higher gloss and greater durability.

The 90% of Boiled Oil gives the painter his second big value — the value of accurate drying and the elimination of film burning. Pol-mer-ik Boiled enables your painter-customers to talk, sell, and deliver a finer-appearing, longer-lasting paint job. It enables you to control your linseed oil profits. Feature Pol-mer-ik Boiled in Cans. Mail the coupon for complete details.

## 60,000 PAINTING CONTRACTORS ARE READING THESE ADS!

### HOUSES ON FIRE!! BUT NO FLAMES PREVENT FILM BURNING WITH POL-MER-IK *Boiled*

Free Folders are available for distribution to your customers. They tell the story of Pol-mer-ik Boiled — of the extra value of Cooked Oil at no extra cost — of the value of the accurate-drying Boiled Oil. These folders are free to dealers who want to make more money from their linseed oil sales.

# The Sensational Flex-Seal COOKER

**PREPARES FOOD**  
In 1/5 the usual time  
Uses only 1/10 the fuel

HERE IS the most amazing cooking utensil ever placed on the market. As easy to use as an ordinary top-of-the-stove saucepan, Flex-Seal cooks all foods in a fraction of the time usually required, and soon pays for itself with the fuel savings it makes possible. Flex-Seal is the pioneer in this field. It is the only cooker of its type that can be opened and closed in a flash with one hand. Though sturdily built of the finest materials, tested for strength and durability, the Flex-Seal is light in weight and therefore a pleasure for the housewife to handle.

Flex-Seal cooks peas in 1/2 minute, beans in 1 minute, cabbage 2 minutes, asparagus 1/2 minute, rice 5 minutes, roast chicken 12 minutes, pork chops 8 minutes—to give a few examples. Other vegetables, meats, soups, cereals, dried fruits, etc., are cooked with the same lightning-like speed.

When vegetables are cooked in a Flex-Seal they retain their natural garden coloring; when served on the table they are beautiful in appearance, with flavor and aroma greatly enhanced. Toughest meats, cooked the Flex-Seal way, become "butter-tender" in from 35 to 40 minutes, so tender you can cut them with a fork. Natural juices, kept intact because of the Flex-Seal system, perform a "self-basting" function that makes Flex-Seal-cooked meats more appetizing; the flavor is delicious regardless of the "cut" of meat.

Because the Flex-Seal system is the safe, waterless way to cook, excluding air during the cooking process, vitamins are not destroyed through oxidation nor are the soluble vitamins thrown away with the "cooking water" as is the case in ordinary cooking. Instead, maximum amounts of these valuable elements and mineral salts remain in the food, to provide the body-building nutriment that promote growth and good health.

**FLEX-SEAL COOKERS  
of ALCOA METAL**

A highly corrosion-resistant magnesium aluminum alloy, with stainless steel cover, are made in four sizes, of highest grade materials and workmanship throughout. All handles are of black molded Bakelite; and metal trim is of either stainless steel or finished in chromium.

Each carries a one-year manufacturer's guarantee: each is constructed to give a limitless amount of service and satisfaction.

of finest quality materials and workmanship throughout, are

made in two sizes. All handles are of black molded Bakelite; and metal trim is of either stainless steel or finished in chromium. Because of famous "Sorb-heet" bottom (a special Flex-Seal development) annoyance of "hot spotting" is completely eliminated. No sticking of food particles; cooker polishes to a brilliant glow in a few moments. Guaranteed by manufacturer for one year.

# SHOPPERS *Turn To buyers*

**WHEN YOU HANDLE THE BETHLEHEM LINE**

**Bright red and white labels  
say good bolts to customers**

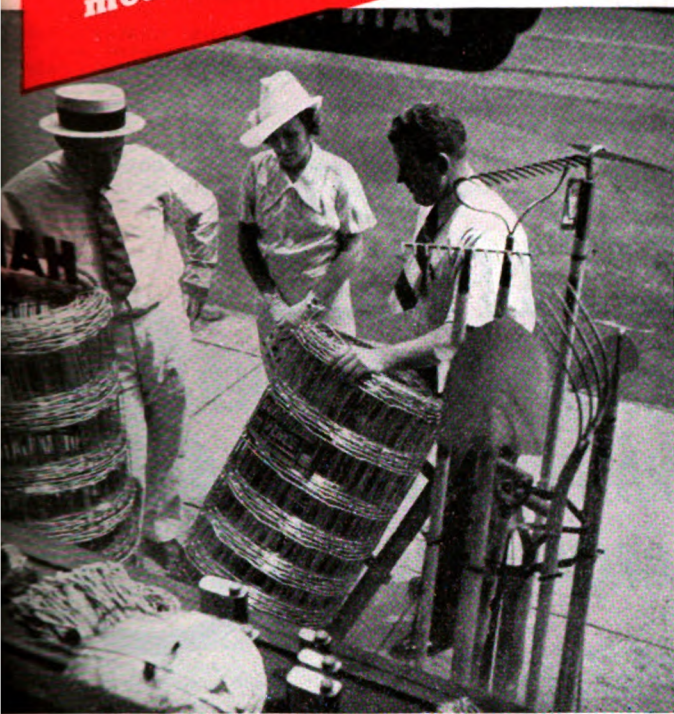

**Bethlehem Fence Posts  
fire-proof . . . rot-proof**

Customers remember Bethlehem Bolts and Nuts. The bright, colorful red and white labels attract attention, act as powerful, silent salesmen on the shelves. More important, customers remember the uniform high quality of these Bethlehem products, the clean, smooth-fitting threads and the snug, sure fit of wrenches on nuts and heads. Your distributor can supply you with this attractively packaged line. Stock it.

Bethlehem steel fence posts sell themselves to economy-minded farmers. They are fire-proof and rot-proof. They are easy to drive, a wooden mallet will do the trick. All posts are fitted with broad, heavy anchor plates that give extra bearing strength and help hold the posts erect. Stock the complete line. They'll help boost your sales of bethanized fence.

**Extra values in bethanized  
mean extra business to you**

**There's a Bethlehem Roofing  
for every customer's needs**

The extra values built into bethanized fence pack the solid sales appeal that turns casual shoppers into buyers and boosters. Study these four outstanding sales features that put you way out in front of competition when you stock bethanized fence:

**1. A special coating**—The bethanized coating is locked to the fence wire by electricity. It is tighter, purer, more uniform in thickness than any other type of fence coating on the market.

**2. Rust-fighting base wire**—All bethanized fence is woven of sturdy, full-gage wire containing not less than .20 per cent copper to give it extra rust-resistance.

**3. Strong flexible construction**—Stay wires in bethanized fence meet the line wires in powerful "hinge-joints." Cattle, hogs or horses can't ride down or weaken this strong, flexible barrier.

**4. Full tension curves**—Smooth, deep "tension curves" in the line wires permit bethanized fence to be stretched evenly and neatly over rough, bumpy ground. These curves contract or expand with changes in temperature, keep fence tight at all times.

When you carry the complete line of Bethlehem Galvanized Steel Roofing every building on the farm offers you a potential roofing profit. No matter how choosy your customer is about roofing design there's a Bethlehem sheet to meet his requirements exactly:

**Stormproof roofing.** This rain-tight, double-drain design permanently locks out the weather. Stormproof roofs are neat, attractive, appropriate on any farm building.

**Roll roofing.** Bethlehem roll roofing is smooth-seaming, protected against weather by a tight, durable zinc coating. It's easy to apply, looks well wherever used.

**Corrugated roofing.** Bethlehem corrugated roofing is furnished in all standard lengths with 1¼-in. or 2½-in. corrugations.

**V-crimp roofing.** Bethlehem furnishes 2-V, 3-V and 5-V galvanized steel roofing in all standard lengths. Sheets are brightly-spangled, full-gage steel, well-suited to almost any installation.

## **A complete line of nails, staples and ties**

*Bethlehem nails and staples are neatly packaged, made to drive straight and true. Bethlehem Silver Star Bale Ties are soft and easy to put on. You've got a dependable "live" line when you put Bethlehem wire products in your store.*

# Columbia

## —THE LEADER IN HIGH WHEELING TO STREAMLINING

63 Years of Pioneering  
Bicycle Developments

**H**ORSES SHIED, dogs barked and people gazed with amazement back in 1877 when the daring cyclist dashed down the street on one of the spectacular "high wheelers."

You may be sure he rode a Columbia—for it was the only bicycle built in this country in those days!

It was over 63 years ago when Colonel Albert Pope introduced the first American-made bicycle—and called it "Columbia", the name which has always been recognized as the Hallmark of bicycle quality. Today, when a rider

spins down the road on a new 1940 streamlined Columbia model, everyone knows Columbia is still the style and performance leader.

Columbia is America's precision-made bicycle. It has many exclusive features in construction, finish, and equipment. Columbias are built under strictest inspection standards, rigidly maintained in the largest, most modern and best equipped bicycle factory in the country.

Dealers find Columbia and Columbia-built bicycles the truly profitable line to handle. They are easier to sell—because Columbia is the best known, most widely advertised bicycle.

## METALLIC AMMUNITION—Famous for Accuracy

### CENTER FIRE CARTRIDGES

First in importance are the new Winchester Super Speed Silvertip bullet group of big-game hunting cartridges. Winchester Super Speed loading to maximum velocity and power standards, with the added advantage of the sensational new Silvertip bullet. The Silvertip, double jacketed and double knurled, is the newest development in big-game hunting bullets of the mushroom type. Its advantages are controlled expansion in combination with assured deep penetration and minimum loss of bullet weight within the game animal shot. Encased nose resists expansion until bullet has passed through hide and tough outer muscle tissues. Expansion follows as the bullet enters deeper, in the vital organs, but disintegration or breaking up is prevented by the outer secondary jacket. Furnished in fifteen popular high-power calibers, with a total of eighteen different cartridges.

Regular Winchester Super Speed Staynless and regular Staynless center fire cartridges, including standard types of bullets, round out a full line in the popular standard calibers for rifles, pistols and revolvers. All are accurately loaded to the most advanced ballistic standards and to give full rated velocities. Staynless non-mercuric priming, which provides double protection: First, full protection against rust or corrosion in the firearm bore. Next, greatly increased sensitivity and stability, and non-injurious to cartridge cases. With these vital modern advantages are scientifically combined highest development of accuracy and dependability, for which Winchester Metallic Cartridges have held world-wide recognition for three-quarters of a century.

KEEN-EYED INSPECTORS CANNOT  
FIND "WAVINESS" OR DISTORTION  
IN THIS NEW LUSTRAGLASS

*Baffling new product looks like plate glass but  
sells at window glass prices*

## WHAT IS IT?

Who ever saw a window glass without an obvious distorting waviness? Who ever heard of a plate-like product selling at window glass prices? Well, now it's happened. This amazing new Lustraglass just defies ordinary classification. The uniformity of its perfection has definitely set a new and infinitely higher standard of quality. The ultra-violet rays of sunlight it transmits and the great tensile strength it displays make it the world's most efficient glass for windows. Lustraglass is lighter in color (freer from that greenish cast characteristic of both window and plate glass) than any other glass used for regular glazing.

Add to these advantages its jewel-like luster and you have a product that architects and builders agree is really a new species . . . That's today's Lustraglass and if it isn't window glass and it isn't plate glass—what is it?

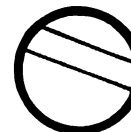

**THE SHADOWGRAPH TELLS THE STORY**  
*by amplifying distortion and defects 20 times*

(1) This is high quality cylinder drawn window glass. The bent and twisted lines shown by the shadowgraph testing device indicate the presence of considerable distortion. This glass became obsolete in 1928.

(2) Here is what most manufacturers offer today as top quality window glass . . . Made by the sheet drawn process, it shows a characteristic distortion in the waviness of the black lines.

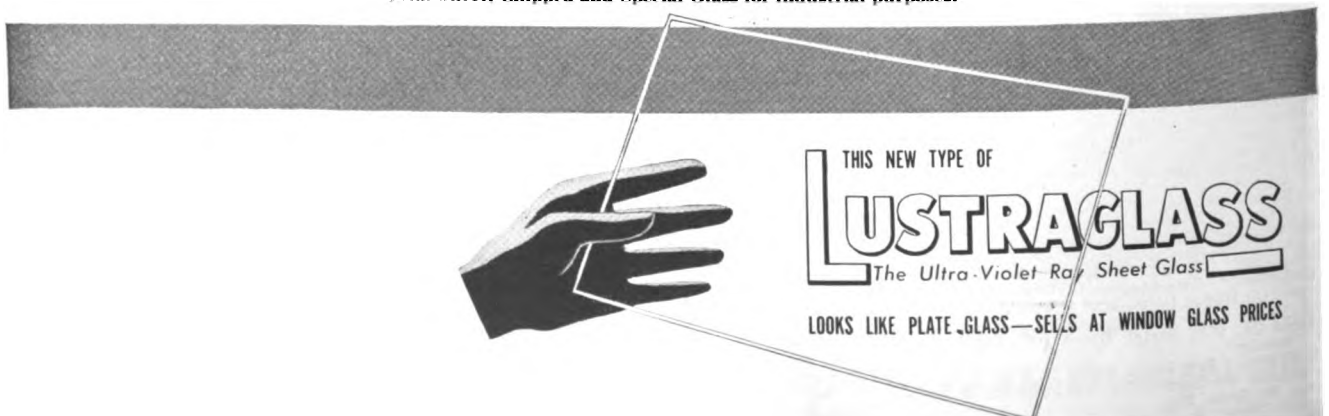

(3) Now look at this "shadowgraphed" sample of the new Lustraglass. Obviously an important improvement. The lines are straight, showing relatively perfect vision—freedom from distortion.

★ Write for the new Windowgraph Slide Rule Chart and a sample of the new Lustraglass. Examine both—then tell us what you think.

**AMERICAN WINDOW GLASS CO., PITTSBURGH, PA.**

*Manufacturers of Plexite, the safer safety glass; Lustrablu and Lustragold for ornamental uses; Crystal Sheet, Chipped and Special Glass for industrial purposes.*

## CONCENTRATE ON GOODYEAR

Now's the time to decide to concentrate on one brand of hose—Goodyear—if you want your full share of hose profits next season. All Goodyear hose carries tough, long-wearing covers of specially compounded rubber over stout carcasses reinforced with strong cotton cords.

1. **SUPERTWIST\* CORD HOSE**—A lightweight yet extremely durable hose that even women and children can handle easily. Brown cover. Made with a reinforcement of the famous Supertwist cord.
2. **GLIDE\* CORD HOSE**—A good hose at a moderate price. Ribbed red cover. Molded hose, reinforced with heavy double-braided cotton cords. Also available with black cover.
3. **PATHFINDER\* CORD HOSE**—High quality at low price. Green cover. Heavy, single-braid, cotton-cord reinforcement. Also furnished with black cover.
4. **OAK\* GARDEN HOSE**—Designed expressly for the low-price market. Single-braid, cotton-cord reinforcement, corrugated dark brown cover.

\*T.M.'s The Goodyear Tire & Rubber Company

**W**HEN it comes to choosing a line of garden hose, you're the dealer.

And for once you've a right to shuffle the cards, cut them—and deal yourself *four aces!*

Because Goodyear hose decks you out with them—all trumps. So it doesn't matter *who* calls.

There's the man who wants the best hose money can buy. And the customer who asks for more than his share of quality for

the least possible money. Then there are the "middlemen"—they want "light hose," or one that's "easy to handle," or "something tough" for a small sum.

The point is this—

Goodyear quality is *ace-high*, and everybody knows it. So when you can say "this is Goodyear hose"—you just don't need anything else.

Because nobody ever even *tied* these four aces!
